

TOWN OF FOND DU LAC

- 1.) Erosion Control Practices shall be implemented and in conformance with Wisconsin Dept. of Natural Resources Technical Standards.
- 2.) Drainage pathways through the site shall be preserved to protect the drainage of upstream property. Operations should generally drain equal land areas in the same direction as before construction to protect neighboring property. Without an approved grading and stormwater management plan, the site shall not water differently from existing conditions.
- 3.) Final stabilization of the site shall include seeding and mulching to control erosion.
- 4.) If applicable, a copy of the Notice of Intent (NOI) for Stormwater Discharges permit from the WDNR sent to the Town, as required per the state administrative code. (sites with more than one acre of disturbance typically need a permit)
